## ANCEL BM700 Update Guide

**Step 1,** Download the update software on ANCEL official website <u>https://anceltech.com/support/download</u> (Must convert the RAR file to a folder before updating).

**Step 2,** Plug the USB of the device into a computer, its screen will be light up, see picture 1. If your computer runs with **Windows 8 or 10**, <u>don't need to install a driver</u>, just open the software "Update" directly and start to update, see picture 2.

**Picture 1:** When connect to the computer, the device screen displays as follows.

Picture 2: Open the update software.

If your computer runs with **Windows 7**, <u>you have to install a driver first</u>, and then open the software "Update" to update.

Step 3, The update starts. Click "Update".
