ANCEL FX3000 Upgrade Guide

There are 2 methods to upgrade the FX3000 scan tool, method 1(Via TF Card) and method 2(Via USB Cable). Here's the upgrade guide following for method 2(Via USB Cable).

Step 1: Before starting the upgrade, please connect this device to a computer via the USB cable, and make network connection stable. (It supports WIN XP, 7, 8, 10 operating systems.)

Step 2: Link to ANCEL website (Register & Log in). https://anceltech.com/account/register

Step 3: Download the update software on a computer. https://anceltech.com/support/download

Step 9: When the 2 progress bars reach 100%, the upgrade completes. Click "Quit" and disconnect the USB cable.

How to check if the FX3000 has installed the latest software?

Connect the FX3000 to a computer and open the update tool. If the local version is the same as the latest version, it has installed the latest version of the software.
